Felipe Carvalho

Junior Full Stack Developer | React · Node.js · REST APIs

Rio de Janeiro, Brazil (remote) · +55 21 99631-0874 · flpcsb@hotmail.com · github.com/flpzht · flpzht.github.io/portfolio · linkedin.com/in/felipecarvalhodesouzabarros

Summary

Junior Full Stack Developer, TripleTen graduate, with 12+ years in finance and controllership. I build web applications with React, Node.js, Express and MongoDB, with JWT authentication and REST APIs. In finance, I cut billing time for 5 products from 10 to 2 business days with Excel and VBA automations. I aim to bring rigor with numbers and business insight to web product development. Advanced English.

Projects

Around The U.S. (full stack, MERN) · live site · GitHub

Photo-sharing social app with sign-up, login, profile and cards for places visited.

Skills: React, Vite, Context API, Node.js, Express, MongoDB, JWT, bcrypt, Nginx, PM2, Git

- Built the React 19 front-end with Context API and login-protected routes.
- Created the REST API in Node.js, Express and MongoDB with JWT authentication, bcrypt password hashing and celebrate/Joi validation.
- Deployed the application on a Linux VM with Nginx, PM2 and HTTPS (Let's Encrypt).

News Explorer (full stack) · front-end · back-end

App to search last week's news by topic and save articles to a personal account.

Skills: React, React Router, Vite, CSS (BEM), Node.js, Express, MongoDB, JWT, REST APIs

- Built the React front-end with news search via News API, pagination, responsive layout and a saved articles page.
- Created the Node.js, Express and MongoDB API with JWT authentication, helmet, rate limiting and winston logging.
- Integrated front-end and back-end for login and per-user saved articles.

Pokémon Card Flip (front-end, vanilla JavaScript) · live site · GitHub

Interactive Pokédex with cards that flip in 3D and expand on click.

Skills: JavaScript (ES Modules), HTML5, CSS3 (Grid, 3D transforms), REST API consumption

- Built a Pokédex that consumes the PokéAPI, with the 151 first-generation Pokémon in a responsive grid, type-based colors and a quantity filter.
- Created the 3D flip animation and overlay card expansion using CSS (perspective, preserve-3d) and JavaScript.
- Organized the code into ES modules (api, animation, types and card components), with no framework.

Experience

Senior Controllership Analyst · Fundação Orquestra Sinfônica Brasileira · Rio de Janeiro, Brazil (hybrid) · Nov 2025 – Mar 2026

- Built the budget spreadsheet used by all departments to track their own budget and spending per project, allowing leftover funds from one project to be reallocated to projects with greater needs.
- Structured expense control and set fixed dates for specific payments, giving visibility into actual spending per expense throughout the two-year project cycle.

Career retraining in web development · DIO (online) · Apr 2025 – Nov 2025 · Studied Python, SQL, Power BI, HTML, CSS and JavaScript.

Freelance Controllership Analyst (self-employed) · Rio de Janeiro, Brazil (remote) · Jan 2024 – Apr 2025

- Built from scratch budget spreadsheets for internal control and per-project profitability calculation, combining the work of each department and employee, the cost to the company and the amount billed.
- Established the calculation base for setting the right price for future services.

Reserve Systems · Rio de Janeiro, Brazil (hybrid) · May 2017 – Dec 2023 · Financial Supervisor (2019–2023), Financial Analyst (2018–2019), Financial Assistant (2017–2018)

- Cut billing time for the company's 5 products from 10 to 2 business days using Excel and VBA.
- Automated billing, cash flow, invoice reports, the monthly inflow/outflow report and the weekly finance report (e.g. delinquency).
- Supervised 2 finance interns.

Education

TripleTen · Web Development Program (Full Stack) · Online · Jan 2026 – Oct 2026

Intensive 10-month, 860-hour program in web application development, covering HTML5, CSS3, JavaScript, React, Node.js, Express.js, MongoDB, REST APIs, Git/GitHub and Webpack. Includes 19 projects with responsive interfaces, API integration, user authentication and complete web applications.

UERJ · B.A. in Economics · Rio de Janeiro, Brazil · Graduated 2018

Certifications: Data Analysis with Python, Power BI and SQL · DIO · 2025 · 68 h

Skills

- **Front-end:** HTML5, CSS3 (Grid), JavaScript (ES6+, DOM, async, OOP), React (Context API, React Router), Vite, Webpack, responsive design, BEM
- **Back-end:** Node.js, Express, MongoDB, Mongoose, REST APIs, JWT authentication, bcrypt
- **Full stack:** MERN, Linux VM deployment (Nginx, PM2, HTTPS)
- **Tools:** Git, GitHub, Jest (basic), Figma (basic)
- **Data and automation:** Advanced Excel, VBA, Power BI, Python (basic), SQL (basic)
- **Languages:** Portuguese (native), English (advanced)
